

Says

I dont know
correct
gestures for
specific
operation

I dont get a
clear 3D
image

I need a
proper
internet
connectivity

I need a sterile
free mechanism
to use radiology
browsing images

What this
mechanism
really does?

I need to
operate
without
moving from
the place

Doesn't
want a Blur
image

What is the
advantage of
using this
methodology

May be this
doesn't
distract my
Work

DOCTORS
RADIOLOGY
TECHNICIANS

Hand gestures
are captured
through the
3D Camera

Ask for a free
trial before
actual
implementation

Unable to
Trust

Excited

Captures
clear images
upto 5
metres

Makes
more
research

Eager to use
the
opportunity
for change

Focused on
work
