| Use already available gesture detection systems such as Gestix | Use foot to operate the device | Can fit sensors in hand to detect gestures |
|--|--------------------------------|--|
| | | |
| | | |

| Deploy on any platforms | Use motion detection algorithms | Use eyes to make gestures | Motion detection sensors can be used | Use sterilized touch screens | Use sta hand gestur |
|-------------------------|---------------------------------|---------------------------|--------------------------------------|---------------------------------------|---------------------------|
| | | | | | |
| | | | | | |

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.
